Experience

YUM! BRANDS

RPA Developer

Louisville, KY

January 2021 – Present

- Developed Robotic Process Automations with UiPath.
- Contributed time savings of 1,200 hours across seven installations.
- Interfaced with end-users of applications and supported processes in attended and unattended mode.
- Documented and updated solution designs throughout the automation life cycle.
- Planned and hosted monthly department-wide cultural events via Microsoft Teams.

BRICK BRIDGE CONSULTING

Senior Developer

Louisville, KY

June 2019 – December 2020

- Developed AWS Lambda Functions in C# as components of an event-based distributed, cloud application.
- Utilized in-house RESTful API and C# Lambda functions to interact with Podio (A Salesforce-like platform) installations and delivered complex automations and other functionality asynchronously.
- Established project management and analytical skills by interfacing directly with clients to design and develop solutions specifically for their business needs in projects ranging from \$1,000 - \$100,000+ in government, non-profit, and for-profit business sectors.

UNIVERSITY OF LOUISVILLE

Teaching Assistant, Software Development I

Louisville, KY

January 2020 – April 2020

- Taught a class of 20+ students to program in C#.
- Facilitated lab sessions surrounding object-oriented concepts such as the use of classes, methods, encapsulation, and inheritance.
- Utilized lab assessments to reinforce programming concepts and graded exams, projects, and homework.

SUPERFAN, INC

Development Intern

Louisville, KY

June 2019 – August 2019

- Completed iOS and Android application builds with and handled build errors with Fastlane and App Store Connect.
- Interfaced with account managers to transfer ownership and create new store listings.
- Imported iCalendar feeds into a custom dashboard and transferred account management assets.
