Summary

- Passionate about Web Development and IT Automation. I have adopted the software development life cycle and agile methodology.

Education

University of Louisville, College of Business (Expected May 2021)

Bachelor of Science in Business Administration in Computer Information Systems

- Concentrations: Web Development, Information Security, and Business Process Management
- GPA: 3.7

Professional Experience

Brick Bridge Consulting – Louisville, KY

Senior Dev <- Software Dev <- Junior Dev <- Entry-Level Dev, June 2019 – Present

- Utilizing in-house RESTful API and writing C# AWS Lambda functions as components of an event-based distributed cloud application to interact with Podio installations and deliver complex automations and other functionality asynchronously.
- Completing projects ranging from \$1,000 - \$100,000+ in Govt, non-profit, and for-profit business sectors.
- Frequently utilizing Amazon Web Services to host and deploy cloud-based functionality (familiarity with Lambda, S3, CloudWatch, and DynamoDB).
- Using CloudWatch to identify and resolve issues with code in development and production environments.
- Conducting unit and integration tests for in-house and external API.
- Structuring Podio CRM systems comprising of platforms, databases, and workflow elements.
- Building client solutions with advanced content management, integration, and automation.
- Using GoToMeeting to engage with clients for live feedback sessions concerning projects.

SuperFan – Louisville, KY

Development Intern, June 2019 – August 2019

- Completed iOS and Android application builds with Fastlane.
- Imported iCalendar feeds into a custom dashboard and transferred account management assets.
- Handled build errors with Fastlane and App Store Connect and documented internal build processes.
- Participated in daily development team conference calls to brainstorm solutions.
- Interfaced with account managers to transfer ownership and created new store listings.
- Successfully assisted the development team in updating Python automation scripts and rerouting to a new APK drop location.
